In re Baird

The Patent and Trademark Office (PTO) has received a decision of the Court of Appeals for the Federal Circuit in *In re Baird*, ____ F.2d ____, 29 USPQ2d 1550 (Fed. Cir. 1994). In the opinion of the Commissioner of Patents and Trademarks, *Baird* was wrongly decided by the Court because an improper standard of patentability under 35 U.S.C. § 103 was applied in assessing the obviousness question before the Court.

The Court's decision in *Baird* is inconsistent with applicable binding precedent. The Board of Patent Appeals and Interferences (Board), in correctly deciding the case, applied and cited the proper binding precedent, which includes *In re Susi*, 440 F.2d 442, 169 USPQ 423 (CCPA 1971), followed by the Federal Circuit in *Merck & Co. v. Biocraft Laboratories, Inc.*, 874 F.2d 804, 10 USPQ2d 1843 (Fed. Cir.), *cert. denied*, 493 U.S. 975 (1989).

Ordinarily, where the Commissioner believes that the Federal Circuit has erroneously decided an appeal, it would be appropriate to ask for reconsideration or to ask the Solicitor General to file a petition for certiorari to seek review of the decision. However, in this case, the PTO has discovered additional reasons for reopening prosecution of the application. Under these circumstances, it would not be appropriate to burden the applicant or the courts with further pleadings when ultimately a rejection will be entered. *Compare In re Gould*, 673 F.2d 1385, 213 USPQ 628 (CCPA 1982) (remand to Board authorized even after appellant filed brief where Solicitor indicated that new rejection would be made if court reversed rejection on appeal).

In order to properly serve the public and patent applicants appearing before the PTO, it is imperative that the PTO apply a consistent standard of patentability in the examination of patent applications. *Baird* is inconsistent with applicable binding precedent. Accordingly, to maintain uniform standards in the examination of patent applications, patent examiners are directed to follow the *In re Susi* and *Merck* decisions rather than the *Baird* decision and to cite this notice as a full response to any applicant who may rely on the *Baird* decision in responding to rejections.

Should an issue similar to that raised in the *Baird* case come before the Federal Circuit in the future, the conflict between *Baird* and the above-noted binding precedent will be called to the Court's attention so that it may resolve any conflict.

Response Requested to 1993 Patent Examiner's Action Survey

As part of the continuing quality reinforcement efforts of the Patent and Trademark Office, the Office has sent out a Patent Action Survey Form with each Patent Examiner's Office action mailed during a period of several weeks during December, 1993-January, 1994. **If you have received one or more of these forms, please complete each one, no later than the time of response to the Office action being surveyed.**

The survey is intended to determine whether Office actions are perceived to be clear and complete on certain specific and important items related to patent examining practices and procedures. The results of the survey will be used in the development of Office training programs. The survey is a follow-up to the Patent Action Surveys conducted in 1991 and 1992. Where training is provided to address identified deficiencies in performance, follow-up surveys are intended to be conducted in the future to determine whether the training was effective enough to improve performance in the measured areas.

The Survey Form is brief and easy to complete and does not permit identification of the respondent or of the particular application involved. The Survey Form may be completed at the time of response to the Office Action. It is possible that a practitioner may receive many Office Actions containing a Survey Form during the survey period. To have results that are meaningful, the Office needs a high response rate. Therefore, it is **important** that patent practitioners complete each survey form **no later than the time of response to the Office action being surveyed**. To assure that this form is completed and mailed back to the address indicated on the Survey Form, it would be desirable for patent practitioners to have their office managers/docketing personnel take appropriate steps to keep the form and Office action together for the practitioner's benefit.

Your cooperation in completing the Survey Form is appreciated.

Reference Collections of U.S. Patents and Trademarks Available for Public Use in Patent and Trademark Depository Libraries

The following libraries, designated as Patent and Trademark Depository Libraries (PTDLs), receive patent and trademark information in various formats from the U.S. Patent and Trademark Office. Many PTDLs have on file all full-text patents issued since 1790, trademarks published since 1872, and select collections of foreign patents. All PDTLs have both the patent and trademark sections of the *Official Gazette of the U. S. Patent and Trademark Office*. The full-text utility and design patents are distributed numerically on 16 mm microfilm, and plant patents on color microfiche. Patent and trademark search systems on CD-ROM (Compact Disc-Read Only) format are available at all PTDLs to increase utilization of and enhance access to the information found in patents and trademarks. It is through the CD-ROM systems that prelminary patent and trademark searches can be conducted through the numerically arranged collections. All information is available for use by the public free of charge.

In addition, each PTDL offers reference publications which outline and provide access to the patent and trademark classification systems, as well as other documents and publications which supplement the basic search tools. PTDLs provide technical staff assistance in using all materials. Facilities for making paper copies of patent and trademark information are generally provided for a fee.

Since there are variations in the scope of patent and trademark collections among the PTDLs, and their hours of service to the public vary, anyone contemplating use of these collections at a particular library is urged to contact that library in advance about its collections, services, and hours in order to avert possible inconvenience.

SECTION 2.—INTERNATIONAL CLASSIFICATION

The short titles associated below with the international class numbers are terms designed merely for quick identification and are not an official part of the international classification. The full names of international classes are given in section 6.1 of the trademark rules of practice.

The designation "U.S. Cl." appearing in this section refers to the U.S. class in effect prior to Sep. 1, 1973 rather than the international class which applies to applications filed on or after that date. For adoption of international classification see notice in the OFFICIAL GAZETTE of Jun. 26, 1973 (911 O.G. TM 210).
